

## **BABY**

Manual-feed bench horizontal end-milling designed to machine rounded glazing beads. Performs the milling needed for the glazing beads, cut at 45° or 90° depending on the series, to snap onto the frame. Downward movement on ball-bearing bars and bushes. Vertical clamp with pneumatic release. Adjustable depth stop and fully protected work area.

## Technical details

Three-phase power supply	380/400-50/60	Volt-Hz
Three-phase motor power	0.5	kW
Spindle speed	2850	rpm
X axis stroke	140	mm
Max cutter diameter	100	mm
Weight	25	kg

## Fittings

Service spanner bag  
Operator's and maintenance manual with EC declaration  
Spray can 0.4 litres neat oil  
Mill cutter unit  
Counter profile  
Air blowing gun for cleaning

## Accessories

Micro-mist pneumatic tool lubrication (emulsified oil)  
Mill cutter unit for different series /to specification  
Counter profile for different series / to specification
